BIOLOGY: CYCLES OF LIFE TEACHERS EDITION AGS Secondary

This text explores patterns, along with ever-evolving diversity. First, the text puts the smallest unit of life—the cell—under a microscope. Students learn about the parts of cells, their chemistry, and how they function and create energy. Next, the text introduces more complex biological systems. It studies cellular reproduction, inheritance patterns, and genetics. Lastly, they examine how biological systems act upon each other in communities and ecosystems. Overall, this high-interest, low-readability text makes it easy for you to engage students who struggle with reading, language, or a learning disability.

Lexile Level 850

Reading Level 3-4

Interest Level 6-12
