BPMN Process Examples: Modelling Business Processes Using Practical Examples

Kenneth J Sherry

BPMN Process Examples: Modelling Business Processes Using Practical Examples Kenneth J Sherry
BPMN is an established and extensive business process notation providing many ways to diagrammatically define solutions. After receiving many requests to demonstrate the use of BPMN, I decided to modify some of my past business process models and collate them into BPMN Process Examples. The book comprises of six complete examples of end to end business process models and shows alternative modelling techniques. Each example has an overview, the choreography between the collaborating partners and the BPD of the inline sub-processes. The sub-processes are shown in separate BPD's depicting the tasks needed to complete the inline process. The book pages are designed so that the description is on the left side of the page and the BDP on the right, allowing the reader to view the description and the BDP at the same time.
