Astronomy

"This is a practical and stunningly beautiful guide whose core is a descriptive tour of the best celestial sights: open and globular clusters, nebulae, galaxies, and large areas of sky. The photos in black and white and color, are magnificent. The text goes beyond ordinary descriptions to tell the reader something about each object's nature."

"Packed with information that I have encountered nowhere else in amateur-astronomy literature. *Sky Vistas* also includes 48 full-page color astrophotos by Gerald Rhemann, most of which are magnificent."
