Clusters and Superclusters of Galaxies (Nato Science Series C:)

Clusters and Superclusters of Galaxies (Nato Science Series C:)

Clusters and superclusters of galaxies are the largest objects in the Universe. They have been the subject of intense observational studies at a variety of wavelengths, from radio to X-ray which has provoked much theoretical debate and advanced our understanding of the recent evolution of the large-scale structure of the Universe. The current status of the subject is reviewed in this volume by active researchers who lectured at a Nato Advanced Study Institute held in Cambridge, England in July 1991.

Much of the material is presented in a pedagogical manner and will appeal to scientists, astronomers and graduate students interested in extragalactic astronomy.
