Introduction to Evolutionary Algorithms (Decision Engineering) Xinjie Yu, Mitsuo Gen

Evolutionary algorithms are becoming increasingly attractive across various disciplines, such as operations research, computer science, industrial engineering, electrical engineering, social science and economics. Introduction to Evolutionary Algorithms presents an insightful, comprehensive, and up-to-date treatment of evolutionary algorithms. It covers such hot topics as: • genetic algorithms, • differential evolution, • swarm intelligence, and • artificial immune systems. The reader is introduced to a range of applications, as Introduction to Evolutionary Algorithms demonstrates how to model real world problems, how to encode and decode individuals, and how to design effective search operators according to the chromosome structures with examples of constraint optimization, multiobjective optimization, combinatorial optimization, and supervised/unsupervised learning. This emphasis on practical applications will benefit all students, whether they choose to continue their academic career or to enter a particular industry. Introduction to Evolutionary Algorithms is intended as a textbook or self-study material for both advanced undergraduates and graduate students. Additional features such as recommended further reading and ideas for research projects combine to form an accessible and interesting pedagogical approach to this widely used discipline.

From reader reviews:

Maria Gomez:

What do you about book? It is not important along? Or just adding material when you require something to explain what the ones you have problem? How about your free time? Or are you busy person? If you don't have spare time to accomplish others business, it is give you a sense of feeling bored faster. And you have extra time? What did you do? Everybody has many questions above. They need to answer that question due to the fact just their can do which. It said that about book. Book is familiar in each person. Yes, it is suitable. Because start from on kindergarten until university need this kind of Introduction to Evolutionary Algorithms (Decision Engineering) to read.

Philip Kirkpatrick:

Spent a free time for you to be fun activity to complete! A lot of people spent their down time with their family, or their friends. Usually they accomplishing activity like watching television, likely to beach, or picnic inside park. They actually doing same task every week. Do you feel it? Do you wish to something different to fill your personal free time/ holiday? Can be reading a book may be option to fill your free of charge time/ holiday. The first thing that you'll ask may be what kinds of reserve that you should read. If you want to consider look for book, may be the guide untitled Introduction to Evolutionary Algorithms (Decision Engineering) can be fine book to read. May be it might be best activity to you.

Bruce Jackson:

Can you one of the book lovers? If so, do you ever feeling doubt if you find yourself in the book store? Make an effort to pick one book that you never know the inside because don't evaluate book by its protect may doesn't work the following is difficult job because you are scared that the inside maybe not because fantastic as in the outside seem likes. Maybe you answer might be Introduction to Evolutionary Algorithms (Decision Engineering) why because the wonderful cover that make you consider in regards to the content will not disappoint an individual. The inside or content is actually fantastic as the outside or perhaps cover. Your reading sixth sense will directly show you to pick up this book.

Dennis Utley:

As a scholar exactly feel bored for you to reading. If their teacher requested them to go to the library in order to make summary for some book, they are complained. Just little students that has reading's soul or real their hobby. They just do what the instructor want, like asked to the library. They go to generally there but nothing reading seriously. Any students feel that studying is not important, boring along with can't see colorful photos on there. Yeah, it is to be complicated. Book is very important to suit your needs. As we know that on this age, many ways to get whatever you want. Likewise word says, ways to reach Chinese's country. So , this Introduction to Evolutionary Algorithms (Decision Engineering) can make you experience more interested to read.
