Constructing Intelligent Agents Using Java: Professional Developer's Guide, 2nd Edition Joseph P. Bigus, Jennifer Bigus

This is a state-of-the-art guide on how to build intelligent Web-based applications using Java. Joseph and Jennifer Bigus update and significantly expand their book on building intelligent Web-based applications using Java. Geared to network programmers or Web developers who have previously programmed agents in Smalltalk or C++, this practical book explains in detail how to construct agents capable of learning and competing, including both design principles and actual code for personal agents, network or Web agents, multi-agent systems and commercial agents. New and revised coverage includes agent tools, agent uses for Web applications (including personalization, cross-selling, and e-commerce), and additional AI technologies such as fuzzy logic and genetic algorithms.
