This Clinical Resource Tool is structured around consensus statements developed by the BPH-LUTS±ED Expert Working Group, a panel of primary care physicians and urologists with expertise in the multidimensional care of patients with LUTS and sexual dysfunction. Using a modified Delphi process, the experts consolidated published evidence and expert clinical experience on critical issues involving salient phenomenology, comprehensive assessment and diagnosis, and formulation of appropriate initial and ongoing interdisciplinary care for patients with BPH-LUTS±ED. The consensus statements and accompanying resources are intended as a practical companion to current guidelines, to help clinicians individualize best-practice care for this heterogeneous patient population.
