Performance-Based Fire Engineering of Structures

Yong Wang, Ian Burgess, Frantisek Wald, Martin Gillie

Performance-Based Fire Engineering of Structures Yong Wang, Ian Burgess, Frantisek Wald, Martin Gillie

Major events—notably the Broadgate fire in London, New York’s World Trade Center collapse, and the Windsor Tower fire in Madrid—as well as the enlightening studies at the Cardington fire research project have given international prominence to performance-based structural fire engineering. As a result, structural fire engineering has increasingly attracted the interest not only of fire and structural engineers but also of researchers and students. And studies in recent years have generated a vast number of findings.

Performance-Based Fire Engineering of Structures summarizes the latest knowledge on performance-based approaches to structural fire engineering, enabling readers to critically assess research in the field. Whereas most recent books have been mainly concerned with dissemination of principles encapsulated in established codes of practice such as the Eurocodes, this work addresses in depth:

- Global structural behaviour and modelling
- Progressive collapse of structures in fire and the importance of connection robustness
- The integrity of compartmentation in fire
- Structural fire engineering under realistic fire conditions and its implications for material properties
- The limitations of research results and design methods
- The unexploited potential for advanced fire engineering design

This authoritative book draws on the work of internationally active researchers who were core members of the European Network project’s COST C26 working group on fire resistance. It helps readers develop a thorough understanding of how to use advanced fire engineering design to improve structural safety and reduce construction costs.

From reader reviews:

Joshua Phipps:

Reading a reserve can be one of a lot of exercise that everyone in the world adores. Do you like reading book and so. There are a lot of reasons why people love it. First reading a e-book will give you a lot of new details. When you read a publication you will get new information due to the fact book is one of various ways to share the information or their idea. Second, examining a book will make you actually more imaginative. When you reading through a book especially fiction book the author will bring one to imagine the story how the people do it anything. Third, you could share your knowledge to other folks. When you read this Performance-Based Fire Engineering of Structures, you may tells your family, friends in addition to soon about yours book. Your knowledge can inspire the mediocre, make them reading a reserve.

Tammy Pursell:

The book untitled Performance-Based Fire Engineering of Structures is the publication that recommended to you you just read. You can see the quality of the book content that will be shown to a person. The language that article author use to explained their way of doing something is easily to understand. The copy writer was did a lot of study when write the book, so the information that they share to you personally is absolutely accurate. You also could get the e-book of Performance-Based Fire Engineering of Structures from the publisher to make you far more enjoy free time.

Markus Walker:

The e-book with title Performance-Based Fire Engineering of Structures contains a lot of information that you can understand it. You can get a lot of gain after read this book. This specific book exist new understanding the information that exist in this publication represented the condition of the world today. That is important to yo7u to understand how the improvement of the world. That book will bring you in new era of the glowbal growth. You can read the e-book on your own smart phone, so you can read this anywhere you want.

Phillip Herzog:

Do you have something that you like such as book? The publication lovers usually prefer to pick book like comic, limited story and the biggest you are novel. Now, why not trying Performance-Based Fire Engineering of Structures that give your fun preference will be satisfied by simply reading this book. Reading practice all over the world can be said as the opportunity for people to know world considerably better then how they react towards the world. It can't be mentioned constantly that reading behavior only for the geeky man but for all of you who wants to become success person. So , for all you who want to start studying as your good habit, you could pick Performance-Based Fire Engineering of Structures become your current starter.
