For many years TLC has suffered from the image of being a low sensitivity, low resolution, non-quantitative technique, suitable for chemists, but not a tool for real chromatographers. Whilst perhaps true in the past this attitude no longer reflects the capabilities of modern instrumentalized TLC in all its many forms. This volume represents the proceedings of a meeting in Brighton in 1987 which formed part of a continuing series of one and two day events on TLC organized by the Chromatographic Society either alone or, like this one, in conjunction with other learned bodies. These meetings are designed to keep chromatographers up to date with the latest developments and help promote a more positive image of TLC. Ian Wilson November 1987 v
